

## Amity University farmers took the training of organic farming in the Patanjali Agricultural Research Complex

Farmers should take the nation forward through organic farming: Acharya Balkrishna

This tour and training program is very useful and beneficial for the farmers : Dr. Neetu

Acharya Shree explained the benefits of poison free farming and medicinal plants to farmers

➤ **Haridwar, March 10:** A two-day training on organic farming was organized at Patanjali Anusandhan Complex in which farmers under NABARD project through Amity Krishi Prasara Seva Kendra, Noida participated. On the first day of the training program, Mr. Pawan Kumar (C.G.M., Pori) and Mr. K.N. Sharma

(Director, Soil Testing) in farmers are encouraged to do various activities conducted by Patanjali Biological Research Institute such as Patanjali Krishak Samridhi Programme, soil testing laboratory located in the campus, Earth Doctor (Soil Testing Kit) and Mr. Tarun Sharma (State Incharge, Uttarakhand) for contract farming of medicinal plants. Told about it as well as training to make useful manure, waste-d composer, vermi compost, Jeevamrut etc. in organic farming and through organic snake-ladder game.

On the second day, the training program was started with the blessings of the General Secretary of Patanjali Yogpeeth, Param Pujya Acharya Balkrishna ji. In the program, Acharya Shree told the farmers the benefits of poison-free farming and cultivation of medicinal plants. He called upon the farmers to take the nation forward through organic farming.

On this occasion, Deepak Vashisht (State Incharge, Uttar Pradesh) gave information about organic certification from Yog Mandir Trust, Regional Council and also provided information and its benefits.

Center in-charge Dr. Neetu Singh, who accompanied the farmers, gave detailed information about the agricultural activities conducted by Amity University. He described this visit and training as very useful and beneficial for the farmers. Also agreed on such useful excursions and training in future. At the end of the training program, farmers were taken to visit Patanjali Research Institute and Herbal Garden. <<
